# Continuous research and evolution

**We are guided by a passion for making continuous progress with innovative, high-quality products, never resting on our laurels. We face each new challenge by giving our best – to achieve the best.**

Using an element as essential as water, our dream is to make every garden space an inexhaustible spring of wellness.

An international company which operates in more than 50 countries, we have 50 years of experience in highly technical thermoplastic design and molding.

**Our products arise from the desire to stay one step ahead of our clients' demands and to reinterpret market trends. We start with the end user's needs in order to create high-quality,**

**simple-to-use technical products that are sure to exceed expectations.**

A compact company structure and a business model based on efficiency allow us to ensure utmost quality and reliability from concept to sales. We offer our professional knowledge to create products which unite design, emotions, functionality and a passion for caring for green spaces.

# Key fact

Vertically **integrated**, from product design to mold manufacturing, injection molding and assembling.

headquarter

CORREGGIO  
( REGGIO EMILIA )  
ITALY

**Passion** drives us in our search for top quality products

“The attitude that guides us is steadily progressing in search for innovative and quality products.

Passion, creativity and expertise create products that combine design, emotion, functionality and passion for outdoor/ indoor living.”

**Our products were born from the desire to anticipate needs and translate the new market trends, starting from end user needs, to get their satisfaction with aesthetically pleasing, high quality and simple to use products.**

A fully Italian company characterized by a distinctive and original product concept. Made in Italy excellence attribute.

# A vision on the future

Our aim is to make gardening a customer experience of endless well-being passion drives us in our search for top quality products flexibility helps us to face every new challenge.

# Strengths

MULTI -JET | WATERING GUN

GFPRO | ELECTRONIC PROGRAMMER

ROTAX | SPRINKLER

A complete Framework: Research and Development department, a dynamic and creative marketing staff to take care of the Product Planning Process, from product design to Market Placing. Excellent quality thanks to the careful selection of materials to a technological efficient and productive system.

**An efficient logistic and commercial system that ensures a widespread distribution and a careful customer service.**

**Ability to innovate**

**High quality**

**Made in Italy**

**Fast and accurate delivery**

**Flexible sales support**

**Customized design and manufacturing**

**Easy connection**

# Ecology

**Nature**

**Resources**

**Informed use**

**Respect for the environment**

Making the most of the resources that nature offers us with an awareness, respecting them and making the best use of them in today's society. By acting in this way, it becomes a "way of being", a model to refer to. With this awareness G.F. is facing the future, making its professional expertise available to create products that are both useful and environmentally-friendly. UNI EN ISO 14001:2004 environmental system

certification G.F. has always been very aware of sustainability and reducing the environmental impact. The UNI EN ISO 14001:2004 certification proves our ongoing commitment to control our production performance in compliance with the company environmental policy. By raising awareness at every level of the internal organisation, defining documented objectives and targets, G.F. is committed to

continuously improving its production process accordingly with its environmental policy. GF Eco product Our commitment to environmental sustainability means designing products which take advantage of non-polluting alternative energy. An example from the vast series of G.F. products is the G.F. SUNNY solar shower range: pure energy at our service, using the power of sunlight free of charge.

# Design & functionality

Lifestyles and desires of the customers are collected and turned into exclusive solutions and technologies.

An engineers and product designers team, highly qualified to take care of projects, from the mold to the product realization. An internal prototyping area for the optimization of time to market.

An organisation based on mutual trust and collaboration to offer product quality and service with particular attention to environment and a strong social ethics.

# Quality makes all the difference

Continuous improvement in the quality of products and services, the use of first choice materials, control over products and processes, assessment of customer satisfaction, energy saving, reduction of greenhouse gas

emissions and environmental impact: these are the priorities that have always guided us.

Our compliance with UNI EN ISO 9001: 2008 and UNI EN ISO 14001: 2004 standards represents a guarantee for our customers and shows a constant and active company commitment.

A new way to experience gardening through two product lines: Original Gardening for technical and professional watering projects, Unconventional Gardening for those who are looking for innovative products with modern lines and attractive colors. Our goal is to create avant-garde products featuring Made in Italy design, to make any indoor and outdoor space a pleasant corner for well-being.

## AQUAFLORA HOLIDAY

The ideal solution for your holidays.  
Stand-alone drip watering system for potted plants.

### AQUAFLORA HOLIDAY

Aquaflora Holiday is the stand-alone watering system for potted plants that allows day-trippers and holiday-makers to get away with no worries, and no need to disturb friends and family, while guaranteeing that their plants will stay healthy and continue to flourish.

Simple and practical, all that the Aquaflora Holiday system requires in order to function is a plastic drinks bottle of 0,132 - 0,52 (0,5 - 2 liters) gallons capacity. No need to move any plant from its usual place, and no need for makeshift connections to the water supply.

- **SIMPLICITY:** to start watering, just attach a plastic bottle filled with water to the spike, pierce a small hole in the upturned bottom so that air can escape, then push the spike into the soil and adjust the flow of water as required.
- **STEADY AND MEASURED RELEASE OF WATER:** plants are watered by constant drip irrigation, ensuring that there can be no harmful waterlogging of the roots; the release of water from the bottle is adjusted with a handy tap positioned on the front of the spike.
- **EFFECTIVE WATERING:** the Aquaflora Holiday incorporates a special outlet grille that delivers each successive drip directly to the roots, avoiding waste and evaporation of the water and ensuring that the plant will stay in perfect health.
- **ADAPTABILITY:** suitable for any kind of potted or planter, whatever the size and shape.
- **INDOOR AND OUTDOOR USE:** the Aquaflora Holiday system is suitable both for house plants and for pot plants out in the open.

UNIVERSAL FITTING FOR PLASTIC BOTTLES

## PROGRAMMERS

### Bluetooth® GFPRO Eco Watering Computer irrigation programmer

GFPRO Eco Watering Computer irrigation programmer controlled via GF App to manage home-gardening irrigation directly from your smartphone. Easy to use, it allows irrigation programming by connecting the device to the programmer via Bluetooth® wireless technology. Through the control panel of the GF App it is possible to:

- Set up customized programs: setting irrigation start time, duration and frequency for a maximum of 4 daily irrigations.
- Set up predefined programs: designed for irrigation at the best time of the day and differentiated between surface irrigation and Micro/Drip irrigation.
- Set up the ECO function: it adjusts the duration of the programs previously set according to the current season, thus avoiding water waste for a more ecological choice.
- Manually adjust the programmed watering duration: it is possible to increase or decrease the duration of the programs previously set based on warmer or rainier weather forecasts for the next 3 days.
- Manually open or close the water flow.
- Combine the app and simultaneously manage multiple GFPRO Eco Watering Computer programmers.

App available for iOS and Android devices.

## AQUAFLORA HOLIDAY

# aquaflora holiday

### The ideal solution for your holidays. Stand-alone drip watering system for potted plants.

Aquaflora Holiday is the stand-alone watering system for potted plants that allows day-trippers and holiday-makers to get away with no worries, and no need to disturb friends and family, while guaranteeing that their plants will stay healthy and continue to flourish.

Simple and practical, all that the Aquaflora Holiday system requires in order to function is a plastic drinks bottle of 0,132 - 0,52 gallons (0,5 - 2 litres) capacity. No need to move any plant from its usual place, and no need for makeshift connections to the water supply.

- **SIMPLICITY:** to start watering, just attach a plastic bottle filled with water to the spike, pierce a small hole in the upturned bottom so that air can escape, then push the spike into the soil and adjust the flow of water as required.
- **STEADY AND MEASURED RELEASE OF WATER:** plants are watered by constant drip irrigation, ensuring that there can be no harmful waterlogging of the roots; the release of water from the bottle is adjusted with a handy tap positioned on the front of the spike.
- **EFFECTIVE WATERING:** the Aquaflora Holiday incorporates a special outlet grille that delivers each successive drip directly to the roots, avoiding waste and evaporation of the water and ensuring that the plant will stay in perfect health.
- **ADAPTABILITY:** suitable for any kind of potted or planter, whatever the size and shape.
- **INDOOR AND OUTDOOR USE:** the Aquaflora Holiday system is suitable both for house plants and for potted plants out in the open.

### "AQUAFLORA HOLIDAY TRIS"

Practical hang-pack containing 3 pieces, for keeping all house plants regularly watered during excursions, trips and holidays. Each tris pack contains 3 x Aquaflora Holiday.

## PROGRAMMERS

### Bluetooth® GFPRO Eco Watering Computer irrigation programmer

GFPRO Eco Watering Computer irrigation programmer controlled via GF App to manage home-gardening irrigation directly from your smartphone. Easy to use, it allows irrigation programming by connecting the device to the programmer via Bluetooth® wireless technology. Through the control panel of the GF App it is possible to:

- Set up customized programs: setting irrigation start time, duration and frequency for a maximum of 4 daily irrigations.
- Set up predefined programs: designed for irrigation at the best time of the day and differentiated between surface irrigation and Micro/Drip irrigation.
- Set up the ECO function: it adjusts the duration of the programs previously set according to the current season, thus avoiding water waste for a more ecological choice.
- Manually adjust the programmed watering duration: it is possible to increase or decrease the duration of the programs previously set based on warmer or rainier weather forecasts for the next 3 days.
- Manually open or close the water flow.
- Combine the app and simultaneously manage multiple GFPRO Eco Watering Computer programmers.

App available for iOS and Android devices.

## SOLAR SHOWER

### Sunny line

Using the sun's energy in a natural way, SUNNY LINE solar showers produce free hot water: just like a solar panel, the tank base connected to the water mains and exposed to the sun for about 2 hours to heat the water contained in it up to over 140°F (60°C). This, properly mixed with cold water through the mixer, makes it possible to deliver approximately 15,85 gallons of water at 86°F\* (60 litres of water at 30°C). Several showers at a pleasant temperature are therefore possible: leaving a few minutes between one shower and the next means that they are practically endless throughout the day.

\*The figures vary depending on weather conditions and are calculated in ideal conditions.

**SUNNY is PRACTICAL** The fact that SUNNY is easy to transport, extremely lightweight and simple to handle makes it very versatile: suitable for any outdoor environment, from the garden to the terrace to the pool, SUNNY is also ideal for lovers of caravans and camping.

**SUNNY is BASIC** only 3 components to ensure ease of assembly and disassembly and a minimal aesthetic impact, non-invasive, suitable for any outdoor setting.

**SUNNY is EFFECTIVE** The horizontal development of the base provides better exposure to sunlight compared to vertical development models: this results in increased thermal efficiency in addition to greater speed in the early stages of heating during the day.

**SUNNY is SAFE and ENVIRONMENTALLY-FRIENDLY** The tank base, constantly filled via the connection to the water mains, ensures stability and strength. The pressure regulator also ensures use in total safety. By not using electricity or fuel, the water is heated without affecting the environment in any way and without producing any form of pollution.

## “SUNNY NIAGARA” Solar shower

The Sunny NIAGARA solar shower exploits natural sunlight to produce hot water naturally and free of charge. When exposed to the sun for around two hours, thanks to heating of the water in the tank base the unit can provide several hot showers at the required temperature thanks to the built-in mixer control.

- Contemporary styling
- Ergonomic mixer that allows more precise temperature control and independent selection of flow rate and temperature.
- Height 2.10 m
- Larger tank base and 20 cm diameter shower head for increased flow rate.

# Sunny Style Premium

## “SUNNY STYLE PREMIUM” Solar shower

The “Sunny Style Premium” solar shower uses the energy from the sun’s ray to produce hot water ecologically and without using any electricity. Exposed to the sun for about 2 hours, thanks to the water heating process contained in the tank-base, it supplies many hot showers with adjustable temperature through the handy mixer tap included. It is equipped with extractable and adjustable shower hose in order to assure the best comfort. The new coloured covers make the “Sunny Style Premium” shower more attractive and pleasant complying with all consumer’s preferences!

- Hot and cold water mixer, to adjust the requested temperature
- Stable and safe tank/base
- Adjustable height from 4,60 to 6,90 ft (1,40 to 2,10 m)
- Extractible and adjustable shower hose
- Two inlet pressure regulator with safety valve
- Plug&Play kit equipped with tap adaptor, 2 SOFT TOUCH quick-click hose connectors and 33 ft (10 m) of phthalates free hose for the tap connection.
